1. **Claims 1-17** are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1, 10 and 14 are allowed in view of Applicant's Remarks/Arguments filed on June 13, 2006.

Claims 1, 10 and 14 are allowed because the closest prior art, Sayers (US 2003/0186694) in view of Ray (US 2003/0135626) fails to anticipate or render obvious that a private EV-DO wireless network coupled to a public EV-DO wireless network including a data location register adapted to provide private EV-DO wireless data service, a relay unit adapted to relay a corresponding call connection request received from a terminal entering the private EV-DO wireless network; a call processor adapted to generate a session information request signal with the call connection request signal relayed from the relay unit being a first call connection request, and to process a call by assigning a traffic channel to the connection terminal according to the received session information upon the session information corresponding to the requested session information request signal being received; and a session information processor adapted to request a session information request signal of the corresponding terminal generated by the call processor to a public network data location register in the public EV-DO wireless network, to store session information of the corresponding terminal received from the public network data location register, and to provide the call processor with the

session information of the corresponding terminal, in combination with all other limitations in the claims as defined by applicant.

Dependent claims 2-9, 11-13, and 15-17 are allowable for the same reason as set forth above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
